Life Sciences Pharmaceutical Capability

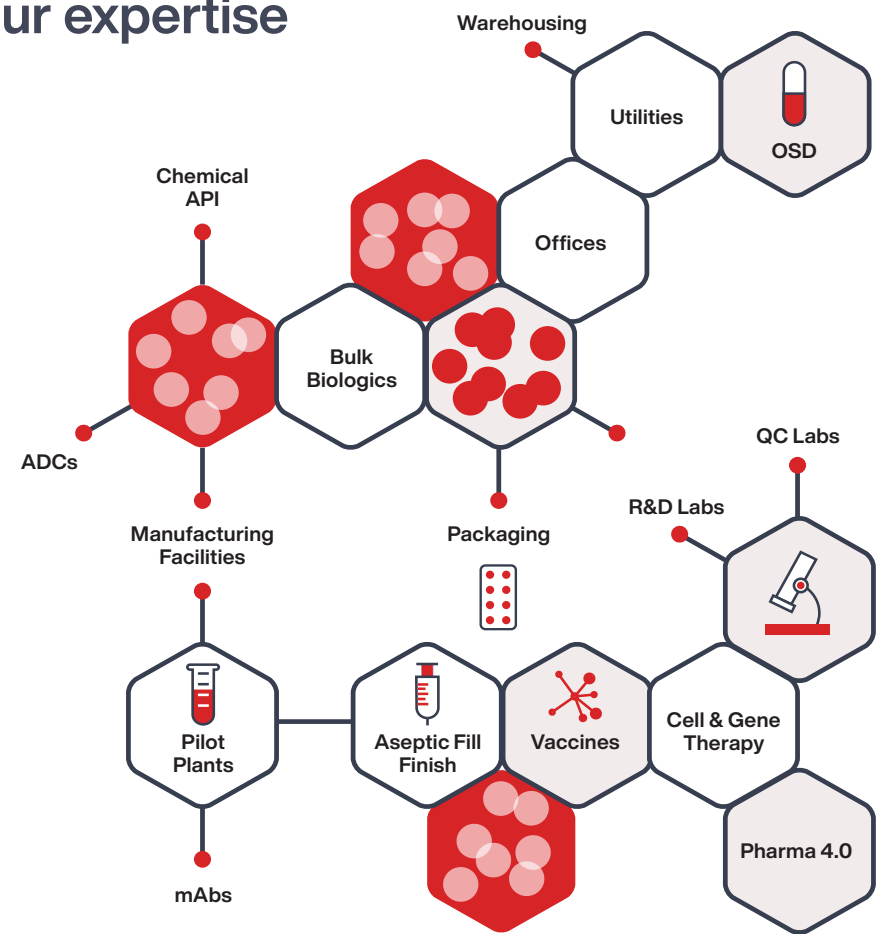

An introduction to PM Group's experience designing,
constructing, commissioning and qualifying Life sciences facilities.

Pharmaceutical manufacturers need to be increasingly responsive to changing market demands. As a result facilities need to be designed for greater flexibility and delivered faster and more cost effectively – we are here to help innovate better solutions and deliver your vision.

PM Group’s team of specialists has successfully delivered innovative Pharma and Biotech projects of all sizes and types for the biggest names in the business. For 50+ years we have brought our knowledge and skills to their projects and we can bring the same excellence to yours, ensuring quality, cost and time line certainty.

Our expertise

UCB, Georgia
Bio Manufacturing Facility (USA)

An impressive portfolio of success for our clients

Takeda, Ireland
High Containment API and DP Facility

Sanofi, Neuville-sur-Saône, France
Modulus | AE (CD, BOD, DD)

Sanofi, Tuas, Singapore
Modulus | AE (CD, BOD, DD)

Delivering your vision

Taking a collaborative partnership approach, we listen to your requirements and gain a deep understanding of your business drivers.

We also strive to identify and suggest added value opportunities to further develop and enhance your vision. Our insight is derived from in-depth industry experience and our knowledge and development of leading edge technological and design innovations.

Whatever the complexity of your challenge, you can be assured that our team will work with you to ensure a successful outcome.

Digital Products

Our digital tools are designed to drive clarity, engagement and performance.

Project delivery services

- Project & program management
- Location selection
- Architecture & masterplanning
- Engineering consulting & design
- Procurement
- Construction services
- Commissioning qualification, validation
- Environment & sustainability
- Health & safety
- Managed services
- Outsourced technical services

Connected Automation

Our Connected Automation services integrates automation, data and compliance into a single, lifecycle driven manufacturing ecosystem.

- Automation
- Computer System Assurance (CSA)
- Asset Device Management
- Predictive/AI
- Laboratory Information System (LIMS)
- Warehouse Systems
- Manufacturing Execution Systems (MES)
- Enterprise Resource Planning (ERP) Integration

Specialist expertise

We have specialist expertise in key technology areas including:

- Process/bioprocess and clean utility design
- Process architecture
- Single use (disposable) technology
- Process simulation
- Cleanroom facilities
- Fill finish technologies
- Aseptic facilities/operations
- Modular and superskid design and construction
- Sustainability and energy efficiency
- Operational excellence
- Lean design
- Process analytical technology
- Smart Manufacturing
- Robotics
- Digital Project Delivery
- Process Safety
- ESG Consultancy (Environmental, Social and Governance)
